IR / RF remotes
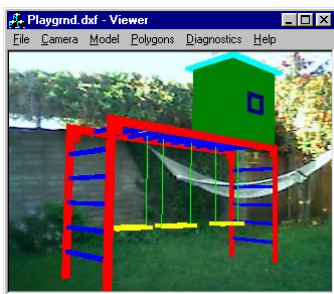

Data acquisition systems

Handheld medical devices

PDA software and accessories

Real-time software

OBE Systems, Inc.

Hardware and Software Engineering

Design Services / Consultants

Functional Prototypes
Proof of concept, feasibility

Production Designs
High performance, low power, low cost

Application and Device Driver Software
Efficient, well documented code

Problem Solving
Systems engineering, troubleshooting

Diverse Experience
Consumer, commercial, medical, telecom

OBE Systems, Inc.

OBE Systems, Inc. is a full service consulting firm specializing in hardware and software development.

OBE Systems, Inc., founded in 1991**,** has the experience that comes from developing winning products in a variety of markets. Each market has its own challenges, from regulatory body requirements to cost sensitive designs.

OBE Systems, Inc. has an established record of quickly and competently developing proof of concept prototypes and turning those prototypes into production designs.

OBE Systems, Inc. hardware and software products have received commercial success and critical acclaim. Several designs can be found in retail stores such as Fry's Electronics and CompUSA. Additional products have received favorable press in magazines and trade journals such as Popular Science, PC Magazine and Communications Week.

OBE Systems, Inc. work has resulted in several patents issued for clients.

OBE Systems, Inc. projects are delivered on time and within budget.

Doing a feasibility study?

Need a professional-looking working prototype?

Short-staffed with a deadline around the corner?

Have a nagging engineering problem but don't have the budget for a full-time engineer?

Contact **OBE Systems, Inc.** with your engineering requirements. Let us show you how we can enhance your development efforts.
